SALE CATALOGUE DISCLAIMER

All reasonable care has been taken by the vendor and designer to ensure that the information provided in this catalogue is correct at the time of publication. However, neither the vendor, selling agents and designer make no other representations about the accuracy, reliability or completeness of any information provided in this catalogue and do not assume any responsibility for the use or interpretation of the information included in the catalogue.

HP Wagyu

HP Wagyu is a Fullblood and Poll wagyu operation that has invested heavily to build a foundation of the best performance outlier genetics from superior wagyu herds. These genetics have gone on to build a prestigious Fullblood herd based on industry leading bloodlines from the ground up that supplies our commercial wagyu operation seedstock. The commercial wagyu operation feeds a larger amount of data back so we can make profitable and informed breeding decision and continue to improve our herds. We have a goal to produce wagyu's with balanced traits, from maternal to carcass, an animal that does it all from F1 to Fullblood.

We are proud to be a part of the Marble High Wagyu Sale offering some of our best genetic from the heart of our herd.

Arubial Wagyu

Arubial Wagyu is a family owned registered fullblood Wagyu herd, operating alongside substantial farming and feedlot enterprises. The Arubial Wagyu family are advocates for objective measurement, and full transparency, therefore we pursue excellence in the arena of data harvest and reporting, giving our clients the tools to make breeding decisions based on fact.

As feedlotters, Arubial Wagyu is heavily involved in a global supply chain which enables us to collect data on over 100 fullblood carcasses per month, that are AusMeat graded.

This data is submitted to Breedplan to enhance our EBV accuracy and authenticity. Arubial has recently installed a Nett Feed Intake system that will enable us to collect data on over 2000 head per year for Nett Feed Intake.

As breeders, Arubial Wagyu concerns itself with all traits maternal, fertility and marbling. The animals offered by Arubial Wagyu in this catalogue represent individuals that are amongst our very best, hand selected from our 3500 strong fullblood cow herd.

Macquarie Wagyu

Macquarie Wagyu follows mantra of breeding backed by performance data.

Situated on the Darling Downs, Queensland, we are a specialist Wagyu Breeding, Backgrounding, Feedlot and Farming operation and our vertical integration allows us to measure whole of life performance. All live and carcase data is submitted to breedplan.

We join around 700 registered females annually through ET, IVF, AI and natural mating.

We are proud to be involved in the Marble High Wagyu Sale. The lots we have on offer feature performance data on both side of their respective pedigrees or actual performance data on the lot itself. They reflect our

breeding goals – combining balanced growth and maternal traits with the all important carcase traits. At the same time we endeavor to maintain diversity of bloodlines.

We don't just follow the trends, we prove our breeding selections in the feedlot and this drives our lot selections for this exclusive genetics sale.

Performance data drives our operation so that you can have confidence when investing in Macquarie Wagyu genetics.

Macquarie Wagyu

Sahara Park Wagyu

Sahara Park Wagyu is a family owned and operated fullblood Wagyu operation located in Rockhampton central Queensland. Producing high quality animals, semen and embryos for both the Australian and international markets.

We are excited to be a part of the Marble High Wagyu Sale and are proud to be offering some of our most elite genetics.

Sahara Park is the proud breeder of the sire of the Grand Champion and Class 1 Fullblood Champion at the Wagyu Branded Beef Competition in 2023, SPWFPP6.

A special thank you to everyone who supported our sale in 2022

CONDITIONS OF SALE

The sale will be conducted under the ALPA Conditions of Sale as applied by GDL and is printed in the back of this catalogue. The following are Special Conditions applied by the Australian Wagyu Association (AWA) to generate a high level of quality assurance.

SALE REGULATIONS

The Marble High Wagyu Sale Vendors offer Lots under the following conditions:

1. All live Lots and sires are AWA registered as Fullbloods or Purebred Polled

2. **BREEDPLAN** - Data published in the sale catalogue is current at the time of printing. Latest data is in the online catalogue.

3. **BREEDING SOUNDNESS & GUARANTEES OF FERTILITY** - All bulls offered for sale have passed a semen fertility test by a registered veterinary surgeon and a semen evaluation certificate will be available.

GUARANTEES OF FERTILITY

BULLS: All bulls are guaranteed breeders and to so prove within six months of the date of sale or by reaching the age of 24 months whichever date shall be later.

FEMALES: All females are guaranteed to go in calf within six months of the date of sale or by the age of 30 months whichever date shall be later. A positive pregnancy test certified by a qualified veterinary surgeon shall be sufficient evidence that the animal is in calf.

CLAIMS: Claims under the above guarantees of fertility must be made to the vendor within six months from the date of sale and prior to the animal entering a quarantine area other than on the vendor's property.

- Claims must be accompanied by a veterinary certificate which must clearly identify the basis of the claim.
- Infertility resulting from injury or disease occurring after the sale of the animal will not be covered by this guarantee.
- Embryo recovery via MOET method or IVF will immediately void any warranty or right to claim against claim against infertility.
- The vendor retains the right to have the animal placed on a property nominated by the vendor or returned to the vendor's property for further assessment of fertility for a period not exceeding six months. In the event of the animal being proven fertile within the period, the costs incurred shall be borne by the purchaser. In the event of the animal not being proven fertile within the period the costs incurred shall be borne by the vendor.

LIABILITY OF A VENDOR: Except for costs defined elsewhere in the conditions of sale, the liability of a vendor in respect to claims relating to fertility shall not exceed the purchase price of the animal(s) or provide mutually agreed upon replacement animals.

REFUNDS: In the event of a claim being substantiated and the purchase price being refunded, the animal(s) shall automatically become the property of the vendor and be returned to the vendor or be disposed of according to vendor instructions at vendor's expense.

This guarantee is voided automatically if the animal is returned to the vendor in poor physical condition or with any injury as determined in the sole discretion of the vendor acting reasonably, or if tests carried out on behalf of the vendor within 14 days of return proved positive to any diseases which may affect the animals fertility or ability to breed naturally, or the purchaser admits that it has or the vendor forms the view acting reasonably that the purchaser has collected and stored semen from a bull or has performed super ovulation or flushed a female.

In the event of a dispute as to whether a lot is a breeder, such dispute shall be resolved by the vendor and the purchaser and the auctioneer. While the auctioneer will use their best endeavours to assist, shall have no liability or responsibility in that regard. In the event that a lot is alleged or proved to be a breeder the purchaser shall nevertheless be obliged to pay the auctioneer the full price and any other monies or interest payable by the purchaser in accordance with these terms and conditions.

4. **PRE-SALE INSPECTIONS:** Bulls at Lillyvale Feedlot are available for inspection by appointment. Contact Laird Morgan on 0428 281 190 to arrange an inspection. Heifers at Lillyvale Feedlot are available for inspection by appointment. Please contact Laird Morgan on 0428 281 190 to arrange an inspection. Lot 8, SCRP22T260K is located at Booth Creek Ranch, Olsburg, Kansas, USA. Please contact Andrew Coates 0011 1 (707) 689-6598 to arrange an inspection. Arubial, Macquarie, HP Wagyu and Sahara welcome inspections at Lillyvale on the day prior to the sale, Tuesday 15th August from 9.00am to 4.00pm. Please register your interest early with Nikita Duthie at GDL 0400 434 085. Protocols will apply at Lillyvale.

5. **SEMEN** - Storage of semen in Australia is at Rocky Repro and TLG. Storage in USA is at Brushy Creek, Texas. Please refer to lot descriptions of each lot location.

6. **SEMEN BIDDING** - The successful purchaser of a lot that has multiples, the high bidder has first option to purchase the additional lots at the same price. This decision must be made at the fall of the hammer. If the purchaser of the initial lot chooses not to purchase additional lot. Lot starting price will be previous lot sale price.

6. **GENETIC CONDITIONS** - Results of DNA testing for specific genetic conditions appear in this catalogue which indicate the lots status and whether it is DNA tested free or 'free by pedigree' of B3, CHS, CL16, and F11.

7. **BIDDING** - the sale will be a live auction with an online interface through Elite Livestock Auctions allowing appropriately registered potential buyers worldwide to bid. First time online bidders should register with elitelivestockauctions.com.au early at least by the day before the sale. Buyers attending the sale will need to register with the Agents prior to the sale.

8. **INSURANCE** - ownership of a Lot changes to the Buyer at the fall of the hammer. Insurance is recommended and will be available at the sale.

9. **EXPORT PROTOCOL** - availability of Lots to International countries is indicated in the catalogue and those buyers should check with authorities to ensure access to their purchases.

10. **TRANSFERS** – the Vendors will transfer the ownership of live Lots to the new owners at no cost to the Buyer.

11. **FREIGHT AND DELIVERY AFTER SALE** - All live animals are at Lillyvale as indicated in the catalogue. Genetic material is stored at registered premises as indicated in the catalogue. Freight is the Buyers' responsibility to arrange and pay for. The contacts of the vendor and semen storage centres are as indicated in the catalogue. Delivery will not be approved until the Buyer has paid in full.

12. **GST** - The sale will be conducted on a GST exclusive basis and GST of 10% will be added to the sale price on the invoice.

13. **RISK & LIABILITY RELEASE** -

- Any person attending the sale does so at his/her own risk.
- All persons attending the sale release the vendors and agents from all actions or demands due to any loss, death, damage or injury occurring on the premises.
- The vendors or agents are not responsible and have no liability for any death or injury to any person or any loss of or damaged to the person attending the Sale, their property or otherwise.

14. **HOW TO BID** - Registered bidders can bid live by attending the auction or bid online through elitelivestockauctions.com.au or by telephone via a nominated agent/ third party approved by the Agents.

15. **BIDDING VARIATIONS (PER LOT OR PER ITEM)**

Lots and will be offered for sale in the following manner:

Live cattle - bidding is per Lot

Semen - bidding is per straw

16. **HEALTH STATUS & TREATMENTS** - The Vendors have completed a Vendor Declaration form and this form is available for perusal on www.elitelivestockauctions.com.au

17. **ACCOMMODATION** - the auction is being conducted live at Burke and Wills Hotel, 554 Ruthven Street, Toowoomba, Qld. The Vendors will be staying at the hotel on the night of the sale and welcome others to join them. Call 07 46322433 to book your accommodation or view burkeandwillshotel.com.au

EBVs

An animal's breeding value is its genetic merit, half of which will be passed on to its progeny. While we will never know the exact breeding value, for performance traits it is possible to make good estimates. These are called Estimated Breeding Values (EBVs). The EBV is, therefore, the best estimate of an animal's genetic merit for that trait. EBVs are expressed as the difference between an individual animal's genetics and the genetic base to which the animal is compared.

ACCURACY

An accuracy value is presented with every EBV and gives an indication of the amount of information that has been used in the calculation of that EBV. The higher the accuracy, the lower the likelihood of change in the animal's EBV as more information is analysed for that animal or its relatives.

- Less than 50% = Low accuracy and should be considered a preliminary estimate. The EBV could change substantially as more performance information becomes available.
- 50 – 74% = Medium accuracy, usually based on the animal's own records and pedigree. n 75 – 90% = Medium-high accuracy and usually includes some progeny information.
- Becoming a more reliable indicator of the animal's value as a parent. n 90% and above = High accuracy.

BIRTH

GL: Gestation Length EBV (days) is based on AI records. Lower (negative) GL EBVs indicate shorter gestation lengths which generally relate to lighter birth weights and easier calving.

BWT: Birth Weight EBV (kg) is based on the measured birth weight of animals, adjusted for dam age. The lower the value the lighter the calf at birth and the lower the likelihood of a difficult birth. This is particularly important when selecting sires for use over heifers calving at 2 years of age.

GROWTH

200: 200-Day Milk EBV (kg) is an estimate of an animal's milking ability. For sires, this EBV is indicative of their daughter's milking ability as it affects the 200-Day weight of their calves. **200:** 200-Day Growth EBV (kg) is calculated from the weight of animals taken between 80 and 300 days of age. Values are adjusted to 200 days, and dam age. This EBV is the best single estimate of an animal's genetic merit for growth to early ages.

400: 400-Day Weight EBV (kg) is calculated from the weight of progeny taken between 301 and 500 days of age, adjusted to 400 days and dam age. This EBV is the best single estimate of an animal's genetic merit for yearling weight.

600: 600-Day Weight EBV (kg) is calculated from the weight of progeny taken between 501 and 900 days of age,

adjusted to 600 days and for dam age. This EBV is the best single estimate of an animal's genetic merit for growth beyond yearling age.

FERTILITY

SS: Scrotal Size EBV (cm) is an indicator of male fertility in regard to semen quality and quantity in Western cattle breeds. Higher (positive) EBVs indicate higher fertility. There is also a favourable genetic relationship with age of puberty in female progeny. The relationship between scrotal size and fertility in Wagyu is assumed, but not proven.

CARCASE

Carcase Weight EBV (kg) is based on abattoir carcass records and live weight measurements (particularly at 600-Day weight) and is an indicator of the genetic differences in carcass weight at the industry average slaughter age of 990 days. Larger positive values are more favourable.

EMA: The EMA EBV (cm²) estimates genetic differences in eye muscle area at the 12/13th rib site of a 420kg dressed carcass. More positive EBVs indicates larger eye muscle area and higher retail beef yields. Ultrasound, Aus-Meat and Japanese Digital Image Camera measurements contribute to this EBV.

Rump Fat: The Rump Fat EBV (mm) estimates the genetic differences in fat depth at the P8 site of a 420kg dressed carcass. More positive EBVs indicate more subcutaneous fat and earlier maturity.

RBV: The Retail Beef Yield Percent EBV (%) estimates the genetic differences in total (boned out) meat yield as a percentage of a 420kg dressed carcass. A more positive EBV indicates higher percentage yield for the 420kg carcass weight.

Marble Score EBV: The Aus-Meat Marble Score is an estimate of the genetic difference in the Marble Score in a 420kg carcass. Marble Score EBVs utilise the Aus-Meat Marble Score scale of 1 to 10, where 10 is equivalent to 9+. Where results from the Japanese Digital Image Camera are available, marbling percentage and fineness are also used to calculate Marble Score EBVs. Larger positive values are more favourable.

Marble Fineness EBV: (Marbling Fineness Index) estimates the genetic differences in the Marbling Fineness Index (degree of fleck of marbling fat) as measured by the Japanese Digital Image Camera. A more positive EBV indicates higher levels of marbling fineness.

HOW TO REGISTER with

ELITE LIVESTOCK AUCTIONS

Simply go to
www.elitelivestockauctions.com.au
using your desktop, laptop, iPad, iPhone
or android device.

Click on the **"Sign Up"** page / link

Create a bidding profile using the bidder
registration page.
*(You can either register as a livestock
agent, company or private buyer)*

Agree to the Elite Livestock Auctions
Terms & Conditions and the Selling
Agents Sale Terms & Conditions as
printed in the official Sale Catalogue

Click **"Register"**

You will then be notified by email that an
account has been created.

Once an account has been created you
are all **"Set to Bid"**

Each Auction can then be viewed by
clicking **"Live Auction"** logo on the Elite
Livestock Auctions website.

Once you receive email notification that
your account has been created please
go to the sale you wish to bid at and
click **"Request to Bid"**

The sale will then approve your appli-
cation to bid and on the sale catalogue
you will see **"✓ Bid Request Approved"**

On Sale day simply login, click "Enter
Auction" on the catalogue page and you
can start bidding.
(There is no need for software download)

At the completion of the auction, invoic-
ing will be carried out as per your regis-
tration details by the Selling Agents.

Comments:

A impressive daughter of our Mayura L0010, R155 boasts +28 CWT, +8.0 EMA and +2.2MS for GEBVS. R155's dam has a very deep pedigree going back to Terutani 40/1, Shikikan and Blackmore Y398 (TF146) but also a royal flush of maternal lines including dai 2 kinntou, double cross of suzitani, Aizakura and Blackmore Azuza. R155 is open for breeding with a bull calf at foot born 24/06/23 (HPEF23U0366 rego pending). The calf is the first progeny sold from our jointly owned Blackmore Kinyasu Q619 \$220,000.

									\$222.00	\$210.00		\$208.00		

Comments:

R138 is another daughter of our proven sire Mayura L0010. L0010 consistently produces top carcasses in our operation averaging over Ausmeat MS 7 in Brahman F1's, over Ausmeat 8 in Angus F1, with the majority of his carcasses grading Ausmeat 9. A pen of L0010 steers recently took out the stage 1 of the 2023 Ekka Wagyu paddock to plate competition with the highest ADG. R138's dam Kyoto Megumi is a proven dam sired by Wightman Itoshigenami and going back to the proven Sumo Ruki, Chiyotake and Hikokura maternal lines in her pedigree. R138 is open for breeding with a heifer calf at foot born 22/06/23 (HPEF23U0366 rego pending). The calf is the first progeny sold from our jointly owned Blackmore Kinyasu Q619 \$220,000.

									\$301.00		\$260.00		\$256.00	

Comments:

R80 comes straight out of the Arubial donor paddock. As a maiden heifer she was flushed three times for an average of 6.2 embryos then put in calf to Arubial's young super sire Regal R738. Due to calve prior to sale. The purchaser of this lot sets themselves up to go straight to the elite end of Wagyu genetics with a proven pedigree. R80's Dam GWWFD8442 has had two carcasses for an Aus Meat Accredited marble score 9 and an average HCWT of 420kg. Comfortably in the top 1% for SRI and F1TI. A rare combination of positive milk, huge EMA and huge marbling. This female sells open and ready for flushing.

Comments:

A two in one package, this female is by the highly credentialed Arubial United P342. S197's pedigree reads like the who's who of the Wagyu breed. S197 is line bred to our old super cow, BDWFC1624 (United's Dam) giving confidence to the strength and consistency of her pedigree. A full sister to the grandam has had two carcasses to average an 8.5 marble score (Aus Meat Accredited.) S197 is the full or half-maternal sister to five bulls that have been retained in the Arubial sire battery, with more younger brothers looking promising to be retained. Heifer calf MYMF23U0031 has the potential to be another donor cow. Sells open and ready to flush.

Comments:

S32 is a direct daughter of the marble powerhouse WKS YASUFUKU JR out of a DM100 TF147 cow. S32 is the Full sister to SPWFR153 the \$240,000 record breaking wagyu male at the 2022 Elite Wagyu Sale. S32 has a bull calf at foot (U340) by the up-and-coming sire in HPEFR157 who semen sold for \$16,000 per straw in the 2022 Marble High sale. S32 is unjoined and ready to flush to the sire of your choice. A great package to take you breeding program into the future.

Comments:

R175 is a daughter of Macquaries N100, who has impressive early carcass data through their operation but breeds beautiful females. A full sister recently sold for USD\$57,500 to Wilders Wagyu at the Wagyu Sekai Royal Bloodlines Sale in Canada. R175's Shigeshigetani dam L0032 is our best flushing doner cow at HP Wagyu and she is performing extremely well in our carcass operation for MS and EMA. Recently our bull Mayura Precision who is a son of L0032 graded his first carcass through the Mayura operation with a AUSMEAT 9, 127.7EMA and 427kg. R175 goes back to the Chiyotake maternal line. R175 is PTIC to our new up and coming sire HP Wagyu Reliable HPEFR157, Reliable's semen sold to \$16,000 per straw at last year's Marble High Sale.

Comments:

Macquarie Tribute 260K is the first polled G113 daughter to be offered for sale in the world. Her pedigree combines G113 and H33, who hails from the highly sought after Bar R polled program. She is yet another example of what G113 can produce in a female. His daughters have so far produced 54 carcasses averaging AUSMB 8.5. Importantly half of these are from cover bulls naturally mated. Tribute presents an opportunity to purchase rare and valuable polled genetics that have the carcass and performance data behind the pedigree. She was ultrasound scanned on 15 July 2023 to validate breeding potential and she showed above average follicle count and very good reproduction potential. For international and domestic buyers, there is the option of housing at Bluestem Embryo Transfer Centre at Abilene, Kansas to begin IVF embryo production or export qualified conventional embryo production.

Comments:

T0255 is the first ever polled female we have sold and is sired by the rare Q0168 top priced poll bull we purchased at the Mayura sale from Poll Wagyu. Unfortunately for us Q0168 broke his leg fighting and had to be euthanised with us only collecting a very small amount of semen. We are using Q0168 in our herd sparingly. Q0168 is a double cross of junior out of a proven maternal line in the Poll Wagyu herd. T0255's dam is by Kyoto Megumi which was a proven dam for Kyoto out of Wightman Itoshigenami X91. T0255 sells with a straws of POLL WAGYU DM100-52Y-Z278-MICHI HP X021 PWYPQX021, this is the first straw ever released outside of our herd. X21's grandmother Island Wagyu C2510 is averaging across 4 carcasses: Ausmeat 9+, HSCW 426kg.

Comments:

BDWFS0152 is yet another example of what G113 can produce in a female. His daughters have so far produced 54 carcasses averaging AUSMB 8.5. Importantly half of these are from cover bulls naturally mated.

Her maternal pedigree is just as good, daughters from her grandsire C1255 are averaging MS 8.6 from 18 carcasses they have produced. On top of this her maternal grand dam is a donor cow who averages MS 9.2 from 5 carcasses.

Her EBVs reflect her pedigree with the rare balance of both excellent maternal and carcass values and as a bonus she is tested recessive free from all known recessive disorders. Phenotypically S0152 is the usual robust well grown G113 daughter we have come to expect weighing 542 kg at 24 months of age.

Comments:

An elite United heifer who has come directly out of the Arubial donor females. Females with this balance of numbers rarely come on the market. Don't miss the huge EMA and massive marbling in this female. T353's dam, LFDFN0023 has had one carcass recorded for a marble score 9 and HSCW 344.5, giving confidence to the EBV marble score of +3.1 in this heifer. The raw carcass data collected to date is giving us more and more confidence in the reliability of the EBV numbers.

Comments:

Another extremely well-balanced female straight out of the Arubial donor herd. T1287 excels with a huge carcase weight and massive marble score EBV of +3.1. T1287 is a lovely feminine female that offers another opportunity to produce progeny at the elite level. If she had been retained by Arubial, she would have been joined to United, or one of his super sons. T1287 possesses a depth of pedigree with G113, Y408, TF148 and TF147 to give confidence in her potential to breed on.

Comments:

BDWFS0162 is yet another example of what G113 can produce in a female. His daughters have so far produced 54 carcasses averaging AUSMB 8.5. Half of these are from paddock sires, not handpicked joinings.

Her dam BDWFP0046 is a Y408 daughter and we have found this joining to work extremely well. Further back in her maternal pedigree, grand dam BDWFZ0636 averages an impressive AUSMB 8.4 and has been a donor in our program.

She has excellent carcase EBVs and index values and her data proven pedigree suggests she will perform better than her maternal EBVs suggest.

S0162 exhibits the typical growthy G113 phenotype and temperament and weighed 524 kg at 24 months of age.

Comments:

T10 is a slightly earlier maturing Bond daughter whose numbers would have projected her comfortably into the Arubial donor paddock, had she been retained. Another female with a tremendous set of figures with positive milk, huge EMA and huge marble score. T10's full brother, T41, sells as Lot 34. The line breeding that has occurred in producing this female should give the purchaser confidence in her consistency to breed on (double cross Mayura A139 and double cross Sumo F126 with a dash of the old super cow BDWFC1624 chucked in for good measure). T10's two full sisters are being retained in the Arubial donor herd.

Comments:

T0217 is the only Sanjinami Doi daughter in the sale. Sanjinami Doi is a half brother to HP Wagyu Reliable, they share the same dam L0082 which is one of our top females. L0082 has bred two of our top sires and some of our most impressive females, L0082 is a large frame wagyu female with incredible maternal traits especially passing on milk through to her progeny. T0217's Dam is L0032 and is our best flushing doner cow at HP Wagyu, she is performing extremely well in our carcass operation for MS and EMA. Recently our bull Mayura Precision who is a son of L0032 graded his first fullblood carcass through the Mayura operation with a Ausmeat 9, 127.7EMA and 427kg carcass.

Comments:

T0225 is a full sister to R138 in the sale and daughter of our proven sire Mayura L0010. L0010 consistently produces top carcasses in our operation averaging over MS 7 in Brahman F1's, over 8 in Angus F1 and over 9 in fullbloods we have processed. A pen of L0010 steers recently took out the stage 1 of the Ekka paddock to plate competition with the highest ADG. T0225's dam, Kyoto Megumi is a proven dam sired by Wightman Itoshigenami and going back to the proven Sumo Ruki, Chiyotake and Hikokura maternal lines in her pedigree.

Comments:

R144 is another daughter of our proven sire Mayura L0010. L0010 daughters are known around the world for their incredible milking ability which can be a downside in some wagyu lines, R144 boasts +1 for milk. R144's dam is sired by 148, L0010 over 148 daughters have proven to be a very good cross in our operation, with one selling for the top sale price last year of \$240,000. R144's dam also goes back to the proven Suzitani and Hikokura maternal lines.

Comments:

We lead our 2023 bull offering with an elite son of Arubial United P342. This bull was joined as a yearling bull to the Arubial Stud herd in 2022. S61 has it all, huge growth, positive milk, big EMA and great marbling. S61's SRI of +\$364 sits him comfortably in the top 0.5% of the breed, making him very difficult to part with.

Comments:

BDWF22T0059 features a stellar pedigree including the best of proven Macquarie Wagyu breeding. His 2 grand sires Y408 and G113 need no introduction. His paternal granddam was a donor cow renowned for high marbling carcasses while his maternal granddam has so far had one carcass AUSMB 9 and 440 kg. His young sire BDWFP0690 has so far had one carcass MS 9. T0059's impressive carcass EBVs for Marble Score, EMA and Marble Fineness point to him following in the footsteps of his parents. T0059 is free from all known recessive disorders and weighed 390 kg at 12 months of age.

Comments:

An elite son of Arubial Q256 who is a maternal half-brother to United and sired by the great G113. Q256 is being tested as part of the AWA's PTP and like his half brother, United, his numbers are improving as more data is being submitted and analysed. T1440 is another young sire with a balanced set of numbers that are sure to impress. Big growth, big carcass, big marbling and positive milk.

Comments:

The best son we have ever offer by our sire Mayura L0010. This exact cross a full brother has produced a marble score Ausmeat 9, 127cm EMA and 423kg HCW with only 270 days on feed. T0232 shares the same dam as our bull Mayura Precision who has just produced his first fullblood carcass through the Mayura operation with a Ausmeat 9, a huge 127.7EMA and 427kg.

Comments:

T0257 is a son of a sire in my opinion one of the best Kanadagene 100 sons, Sahara Parks EWETEC P8035. P8035 is a double cross suzitani with 100 on top and Shikikan on the bottom, this is a similar cross of Kura Kin Shikikan E10 who has been an outlier in many herds. We have steers on feed by P8035 in our progeny test and look forward to seeing what they will do. T0257 is out of one of our best TF148 females and is well grown, raises her calves well and has a great nature. This gives T0257 a double cross of suzitani with a double cross of TF148 and also goes back to the Hikokura maternal line.

Comments:

This could be the lot/lots of the sale. As stated at the Robbins Island sale Yasukane 5 is the next super sire. Yasukane 5 recently gave a massive MIJ digital marble score of 19!!!! at Mayura Station. The genetics are an incredible outcross to the TF148 supersires out there which adds to their value and demand. Since these results many have been searching for these straws however they are extremely rare and nearly impossible to find! Only 3 herds have registered progeny in Australia, Robbins Island, Mayura and HP Wagyu. HP Wagyu is going to offer these straws in a once off, one time opportunity as the little amount of remaining straws will be used for our in herd use.

Semen available for domestic use only.

Comments:

A unique opportunity to acquire the only Polled G113 genetics currently available in the world. Discovery is a combination of Superstar Macquarie Wagyu's G113 and USA's Southern Cross Ranch leading polled dam Bar R F104. His sire G113 is already a breed legend with his progeny also breeding on. His daughters have so far produced 54 carcasses averaging AUSMB 8.5. Importantly half of these are from cover bulls naturally mated. Limited early data from G113's sons shows an average well above MS 8 with above average carcase weights. His dam Bar R F104 comes from Jerry Reeve's Bar R program, renowned for producing high marbling genetics, and was selected for her impressive phenotype, size and maternal qualities, along with the incredible longevity and fertility of her dam, 16T, who at 17 years of age still raises a calf every year. His Breedplan EBVs are extremely well balanced and he is recessive free. He weighed 650 kg at 24 months of age

Export straws are stored at Brushy Creek, USA and Rocky Repro, Australia

Comments:

Y408 is one of the foundation sires in the Macquarie Wagyu program and has bred some of the most influential sires and dams in Australia over the last 10 years. His own progeny carcasses have consistently performed in the top 3 in the Macquarie Wagyu program where he is renowned for his high marbling carcasses, excellent fineness and above average HCWT. His sons and daughters used in our breeding program average AUSMB 8.1 and AUSMB 7.9 respectively from their own progeny carcass data dating back to 2012. These straws are rarely offered for sale and offer an opportunity to lift herd improvement with a high degree of confidence. Semen is stored on farm at Macquarie Wagyu and is for domestic use only.

Comments:

“Our super sire Mayura L0010 needs no introduction, he has slowly paved his own legacy in the wagyu breed world-wide with over 1215 registered fullblood progeny in over 78 herds and 1000's of crossbred progeny. Only a small amount of genetics has been released here in Australia in the early years so he is still a very sort after bloodline on home soil, this showed at last year sale when his daughter sold for the top price of \$240,000 and his own straws sold for \$10,000/ straw. L0010 consistently produces top carcasses in our operation averaging over MS 7 in Brahman F1's, over 8 in Angus F, with majority of his carcasses grading Ausmeat 9. A pen of L0010 steers recently took out the stage 1 of the 2023 Ekka Wagyu paddock to plate competition with the highest ADG (average daily gain). We are proud of L0010 and the legacy he is leaving behind. In the same competition one pen of L0010 steers averaged over Ausmeat 8 and over 500kg HCW (carcass weight) in Angus Wagyu F1's.

Semen is stored at TLG, Australia and Brushy Creek, USA.”

Comments:

Is this the successor to G113's crown?
BDWFQ0291 is breeding royalty. He carries the rare combination of proven marbling and growth traits on both sides of his pedigree from the leading genetics in the Macquarie Wagyu herd. His sire, G113 is industry recognised as one of the highest performing Wagyu bulls outside of Japan and his progeny are proving to follow in his famous footsteps. His dam is BDWFM0489, a Y408 cow who is a full sister to Macquarie Prelude. While she doesn't have carcass data yet, we have processed 3 flush siblings, all AUSMB 9 and average HCWT of 476 kg. Sires of the same breeding including Prelude average AUSMB 8.3 from nearly 100 carcasses in the Macquarie program. Q0291 weighs over 900 kg and is tested free from all genetic conditions. He has retained the conformation and temperament from his famous father. Straws are stored at Rocky Repro (export qualified to the USA and South Africa) and also at Brushy Creek USA.

Comments:

BDWFN0100 is making waves internationally. One of his daughters was the top priced female at the recent wagyu Sekai sale in Canada at \$57,000 USD. He is bred in the purple. He is the first bull retained for breeding by our super sire CCOFG0113. He is out of BDWFD1995, a Y408 dam and weighs 870 kg. He only has limited carcass data so far – 4 full blood carcasses averaging AUSMB 8.3 with the excellent HCWT of 464 kg. N0100 is well proven on both sides of his pedigree. His sire, breed legend G113 averages AUSMB 8.5 and 476kg carcasses from over 260 carcasses dating back to 2017 carcasses while his dam averages AUSMB 7.7 and 424 KG carcasses from 7 carcasses. He has excellent allround Breedplan EBVs making him a sire for all occasions and is recessive free. He is fast gaining a reputation for producing growthy, great conformation progeny with outstanding temperament. Straws are stored at both Rocky Repro (exportable to USA and South Africa) and Brushy Creek, USA

Comments:

We have decided to offer a very limited amount of semen in what we consider to be the heir apparent to Arubial United P342. No more semen will be sold in the next 12 months. As of the July 2nd Breedplan Analysis, T714 was the highest F1TI bull in the breed at \$331 and second highest SRI bull at \$413. In my opinion, his balance of numbers is unequaled by any other bull alive today. As at the time of catalogue printing, T714 was collecting viable fresh semen however because of immaturity, it was not freezing. Condition of this sale is frozen semen will be guaranteed maximum 90 days from sale date, or sale is void. T714 is currently in quarantine awaiting export status. No deposit to be paid. See supplement sheet for export status and semen status.

Comments:

We have decided to offer a very limited amount of semen in T1701, the number 1 marbling bull in the breed as of the July 2nd Breedplan Analysis. No more semen will be sold in the next 12 months. T1701 has an EBV marble score of +4.1, combined with an incredible +4 for milk, huge carcass and large eye muscle area. It is not hard to see why we are excited about T1701 at Arubial. As at the time of catalogue printing, T1701 was collecting viable fresh semen however because of immaturity, it was not freezing. Condition of this sale is frozen semen will be guaranteed maximum 90 days from sale date, or sale is void. T1701 is currently in quarantine awaiting export status. No deposit to be paid. See supplement sheet for export status and semen status.

Comments:

"HP Wagyu T0190 is another very exciting up and coming young sire at HP Wagyu. Also reflecting what we are striving to breed at HP Wagyu, high performance balanced animals that have it all. He is sired by one of Macquarie Wagyu's up and coming sire N100, N100 is by G113 out of a Y408 dam. N100 carcasses are performing very well so far and we think N100's progeny are some of the nicest phenotype animals in our herd with a great temperament also. T0190's Shigesigetani dam L0032 is our best flushing doner cow at HP Wagyu and she is performing extremely well in our carcass operation for MS and EMA. Recently our bull Mayura Precision who is a son of L0032 graded his first carcass through the Mayura operation with a Ausmeat 9, 127.7EMA and 427kg. This young bull has incredible balanced GEBVS.

Semen available for domestic use only.

Comments:

Reliable is a outlier sire coming up in our operation having +46 CW, +.41 MF, an impressive +9 for milk and a +3.2 for marble score. Reliable's first semen sold last year to \$16,000/straw. We think that much of this young bull we collected him at 14 months of age and have already Ai'ed him to hundreds of cows in our commercial operation. Both his parents have a incredible phenotype which makes sense he is what he is. Reliable has it all, maternal, growth and carcass. Reliable is the perfect example of what we are striving for when breeding bulls at HP Wagyu and that is to produce bulls that can do it all F1 to Fullblood hence the name Reliable, We think he is a absolute Star and game changer for the wagyu breed.

Semen available for domestic use only.

Comments:

This exciting sire is a powerhouse of proven Mayura genetics with two proven next generation sires in his rare pedigree. Sanjinami doi is a grand son of the legendary itoshigenami Jnr. We bought Sanjinami doi's dam at the 2018 elite sale for at that time a record \$80,000 from Mayura Station, she was the first itoshigenami jnr daughter sold by Scott De Bruin ADBFL0082, she is also the dam of HP Wagyu Reliable. L0082 is one of our largest phenotype elite donor cows in our herd, with great size, milk and free of all disorders. L0082 was in calf at the time to another proven Mayura sire D0482 who had exceptional carcasses coming through the Mayura operation. Sanjinami Doi was the result of that mating. To top it off Sanjinami Doi has an impeccable temperament and is free of all genetic disorders. Wagyu herds such as Trent Bridge and Macquarie Wagyu have bred this balanced young sire into their herds. Sanjinami Doi's semen sold to \$6,000 per straw at last years Marble High Sale.

Semen is stored at Rocky Repro, Australia and Brushy Creek, USA.

Comments:

This young exciting sire is a son of Yasukuku Jnr out of our \$72,500 G113/Y408 daughter we purchased from Macquarie Wagyu. His genomics were a stand out for us with the incredible GEBV's. Many will know how hard it is to breed a Yasufuku Jnr with positive growth and carcass weight EBV's hence why we bred him to a G113 daughter. This resulted in an impressive +31 CW, +9.4 EMA, +2.0 MS and +.30 MF. We are very excited about this stand out Yasufuku jnr, G113, Y408 cross that goes back to the Hikokura maternal line.

Semen available for domestic use only.

Comments:

R0448 is sired by Mayura's future herd leader Mayura Notorious. "Notorious is the Australian trait leader for EMA and the size of his Rib Eye's in the chiller are like dinner plates!" Mayura Notorious semen sold for \$57,500 US dollars per straw. R448 was the first direct and only son bred and sold by Mayura. We paid the second top price of \$95,000 for R448 at the Mayura sale last year. R0448's first Australian release semen straws sold for \$4,000 per straw at last year Marble High Wagyu Sale. R0448 has excellent phenotype a large frame, deep stylish body, wide chest and shoulder, full hind, great capacity in chest, excellent EMA potential. R448's dam goes back to Itohana 2 (Aino 6) and Kituguni jnr (Kituguni 7-8) who are also proven to deliver in the carcass department. R448 has been bred for extreme carcass performance.

Semen is stored at TLG, Australia and Brushy Creek, USA.

Comments:

We purchased this top price unique "Tank" of a bull from the Mayura sale for the top bull price of \$122,500. His first straws at last year sale sold for \$2750/Straw. R152 is an outlier being the earliest maturing bull through Mayura's operation weighing in at 858kgs (1892 lb) at 22mths of age. R0152 is an impressive animal in any breed. He is a unique genetic package, sired by Toshiro 1/3 who recently produced 12 carcasses at Mayura for an average marble score of 8 and a whopping 500kgs HCW. R152's maternal sire Kitaguni 7-8 is one of the greatest bulls of all time in Japan and is still one of the most used bulls in Japan to produce feeder cattle. Also on the dam side L0914 is sired by proven carcass leader JNR and is from the rare Kinu 1 cow line, Kinu 1 was the only 100% Tajima cow to be exported from Japan and the carcass data from this maternal line is in David Blackmore's words "extremely impressive". Grand Dam J0175 has produced 3 carcasses at Mayura for an average Ausmeat 9, EMA 90cm (10/11), HSCW 408kg (900 lb), 27mths. With a sire that is producing extremely large carcasses that marble very well and a dam that has a proven marbling pedigree along with valuable carcass siblings we can't wait to see what this unique bull can do.

Semen is stored at TLG, Australia and Brushy Creek, USA.

LIVESTOCK AUCTION TERMS AND CONDITIONS OF SALE

CHAPTER ONE - PRELIMINARY

1. (a) A vendor is bound by these terms and conditions by offering livestock for sale by auction.
 - (b) An agent (which includes an auctioneer) is bound by these terms and conditions by conducting an auction sale.
 - (c) A buyer is bound by these terms and conditions by bidding at auction.
 - (d) Competition and Consumer Act (Cth) 2010
- It is unlawful for parties that are, or otherwise would be, in competition with each other to make, or give effect to, a contract, arrangement or understanding that contains a provision relating to:
- i. price-fixing; or
 - ii. restricting outputs in the production and supply chain; or
 - iii. allocating customers, suppliers or territories; or
 - iv. bid-rigging; or
 - v. collusive bidding.

Large fines and other sanctions may be imposed for unlawful conduct.

2. (a) In these terms the expression auctioneer, agent, buyer and vendor respectively includes the servants, contractors and agents of each of them. The auctioneer, agent, buyer and vendor shall be wholly responsible for the acts and omissions of their respective servants, contractors and agents. The term "auctioneer" includes, so far as the law and context permits, the vendor's agent.
- (b) When used in these terms the expressions "companion animals" means all animals originating from the same property on a particular day. Where lots are split and sent to multiple establishments, then all of these animals shall be regarded as companions.

3. The following applies in interpreting these terms and conditions:

- (a) The following words have the following meanings:

Fees means all levies, charges, fees, costs and other expenses incurred or relating to these terms and conditions and the sale and purchase of livestock including, without limitation, transaction levies, yard and weigh dues, cartage, advertising and rebates, and whether paid for, or incurred, by the agent;

Livestock means animals auctioned pursuant to these terms and conditions; and

Price means the amount at which the lot has been sold to the buyer referred to in clause 7 of these terms and conditions

- (i) plus any Fees and other expenses incurred in relation to the purchase of livestock that are payable by the buyer; and
 - (ii) plus any GST added in accordance with clause 12.
- (b) These terms and conditions are subject to legislation or regulation in the State in which the auction is conducted and in the event of any conflict then the legislation or regulation will prevail. The provisions of these terms and conditions are in addition to, and do not derogate from, the duties and rights of vendors, agents and buyers set out in legislation and regulation in the State in which the auction is conducted.

CHAPTER TWO - STANDARD TERMS OF SALE

4. Subject to any reserve price, and to the right, prior to the fall of the hammer, of the vendor to withdraw any lot without declaring the reserve, the highest bidder shall be the buyer.

5. The auctioneer has the right to bid on behalf of the vendor provided that right is notified prior to the commencement of the sale and is subject to State law.

6. A bid cannot be made or accepted after the fall of the hammer unless, in accordance with clause 8, the auctioneer decides to put the lot up again.

7. Prior to the fall of the hammer the auctioneer shall announce the last bid and receive any further bids. The last price called by the auctioneer at the fall of the hammer shall be the amount at which the lot has been sold.

8. In the event of a disputed bid, the auctioneer is the sole arbitrator of the successful bidder or the auctioneer may decide to put the lot up again. The auctioneer's decision is final.

9. The auctioneer may refuse to accept any bid which, in the auctioneer's opinion, is not in the best interest of the vendor and need not give reasons for doing so.

10. A bidder shall be deemed to be a principal unless, prior to bidding, the bidder has given to the auctioneer a copy of written authority to bid for or on behalf of another person.

11. The successful bidder at a livestock auction sale must give to the auctioneer at the fall of the hammer:

- (a) the purchaser's name; or
- (b) the bid card number which identifies the purchaser; or
- (c) the name of the person on whose behalf the successful bid was made; and
- (d) the Property Identification Code (known as the "PIC") of destination.

12. The auction shall be conducted on the basis that the bid price shall be exclusive of Goods and Services Tax (GST). GST shall be added after the fall of the hammer for those sales subject to GST.

13. The vendor warrants;

- (a) That the vendor has (or will have) the right to sell the livestock at the time of delivery; and
- (b) That the purchaser will obtain title on completion of the purchaser's obligations under this contract including payment.

14. If a buyer does not comply with any of these terms and conditions, which includes the requirements of State law, any livestock knocked down to that buyer may be re-sold by public auction or private contract in whatever lots and manner the auctioneer decides. The re-sale may be with or without notice and shall be at the buyer's risk. The buyer is responsible for all loss and expense arising out of a re-sale and is not entitled to any resulting profit.

15. The buyer of livestock must pay the agent the full amount of the purchase price in immediate funds on receipt of a tax invoice. Payment is required prior to delivery unless some other time for payment is specified in an agreement between the buyer and the auctioneer that was made before the fall of the hammer. If, before delivery, payment has not been made then clauses 20 to 23 apply.

16. No person may bid unless, prior to the commencement of the sale, that person has made arrangements satisfactory to the auctioneer for payment for livestock purchased. If bids in breach of this condition are inadvertently accepted, delivery shall not be given until

the purchase money is paid and any law, rule or practice to the contrary is accordingly negated as far as possible.

17. (a) Cattle sold on a liveweight basis that are weighed pre-sale are at the risk and expense of the buyer upon the fall of the hammer.
- (b) Cattle sold on a liveweight basis that are weighed post-sale are at the risk and expense of the buyer immediately after weighing.
- (c) All livestock other than cattle sold on a liveweight basis are at the risk and expense of the buyer upon the fall of the hammer.

18. (a) Subject to this clause the sale is complete on the fall of the hammer.

- (b) The time for rejection is the time commencing at the fall of the hammer and ending at the first of:

- (i) delivery is taken by a representative of the buyer;
- (ii) departure of the animal from the purchaser's delivery pen; or
- (iii) one hour after the last animal is:
 - a. in the case of pre-sale weighing, sold; or
 - b. in the case of post-sale weighing, weighed.

- (c) During the time for rejection the buyer may reject any animal which is lame, blind or diseased where that condition existed prior to the fall of the hammer but could not be reasonably observed when the animal was in the selling pen.

- (d) If the purchaser rejects an animal during the time for rejection then the sale of that animal is cancelled and the animal is returned to the vendor or sold on such terms as any buyer and the agent may agree, after the agent has disclosed the reason for rejection to that buyer.

- (e) This subclause applies only to cattle which are sold in Queensland at auction for slaughter. The agent has responsibility for the prevention of loss or escape (but not death, sickness or injury) of those cattle from the time of the fall of the hammer, for delivery to and from the scales, to the buyer's delivery pen and onto the buyer's nominated transport. This responsibility ends at the earlier of those cattle boarding the buyer's nominated transport or sunset on the day after the sale. This subclause does not apply if the agent makes an announcement to that effect prior to sale.

19. (a) Subject to the right of rejection in Clause 18, all conditions and warranties expressed or implied by law are hereby excluded from the sale to the extent that the law allows. All lots are open for inspection prior to the commencement of the sale and are sold with all faults, if any. No compensation shall be given for any faults, imperfections, errors of description, number in or of any lots sold or otherwise.

- (b) Any claim or objection arising out of an error or misdescription in the provision of relevant information in terms of legislation or regulation concerning the National Livestock Identification Scheme (NLIS) must be made by 5:00pm on the seventh day after the fall of the hammer. No objection, requisition or claim against the vendor or agent in respect of such error or misdescription can be made after that time.

- (c) Any statements made by the vendor or the auctioneer whether in writing or orally to the effect that any female has been pregnancy tested or scanned positive shall mean and require only that a certificate in writing shall be supplied to the buyer signed by a qualified veterinary surgeon or certified scanner certifying that the said female has been tested or scanned on the date specified in the certificate and that in the opinion of the surgeon or scanner was pregnant on that date.

- (d) For slaughter cattle, the agent undertakes to make every reasonable effort to ensure that any NLIS cattle device number is transferred from the saleyard PIC to the purchaser's PIC on the NLIS database no later than midnight on the day of the sale.

- (e) For other slaughter livestock the agent undertakes to make every reasonable effort to ensure that the NLIS information is transferred from the saleyard PIC to the purchaser's PIC on the NLIS database no later than midnight on the day of the sale.

- (f) Where livestock have a food safety or market eligibility status derived from the National Vendor Declaration (NVD) and/or the NLIS/ERP database, the agent will inform the buyers by presale catalogue and/or announce the status prior to the offering of those lots.

20. If delivery is made to, or possession obtained by, the buyer or its representative before full payment of the Price, then until full payment is received, the buyer:

- (a) does not acquire title to the livestock;
- (b) holds the livestock as bailee only for the vendor;
- (c) must act in a fiduciary capacity in its relationship with the vendor;
- (d) must store the stock separately or so that they are readily distinguishable from other livestock owned by the buyer;
- (e) is responsible for the safety and well being of the livestock;
- (f) may make a bona fide sale for market value of any or all of the livestock. As between the buyer and the subsequent buyer, the sale shall be made by the buyer in its own name and not as agent for the vendor, however as between the vendor and buyer, the sale shall be made as bailee and agent for the vendor; and
- (g) must keep and account for the proceeds of any subsequent sale separately from its other money and hold those proceeds, together with the benefits of any rights against subsequent buyers, on trust for the vendor.

21. The purchaser agrees that:

- (a) Clause 20 creates a registrable security interest under the Personal Property Securities Act (Cth) 2009 (PPSA);
 - (b) The Purchaser acknowledges the rights of the Seller (and/or the Agent if Clause 25 applies) to register a financing statement under the PPSA with respect to the security interest created by this clause;
 - (c) the Livestock are collateral for the purposes of the PPSA;
 - (d) to the extent permitted, the Purchaser waives any right the Purchaser has under the PPSA to receive notices; and
 - (e) the date upon which the security interest created by this clause comes into force is the first date on which livestock are delivered pursuant to this contract
22. The buyer may not make any claim against the vendor for actions by the vendor or its agent under clauses 20 or 21 and indemnifies the vendor and its agent against any loss, damage, costs, expenses, penalties, fines or claims suffered by the vendor, the agent or any person or entity arising from the vendor exercising its rights under clauses 20 or 21.

- 23.1. Clause 23 applies whenever the agent pays the vendor before being paid by the buyer, which the agent is not bound to do. The agent is then the del credere agent of the vendor at law.

- 23.2. The vendor hereby gives notice to the buyer of the assignments referred to in clause 23.3.

23.3. When this clause applies, in addition to any rights of the agent that arise by operation of the law, the parties agree that, subject to clause 23.5 the agent is subrogated to all rights of the vendor under these terms and conditions against the buyer.

23.4. The vendor acknowledges that the agent may take enforcement, repossession or other action to recover any livestock for which the buyer has not paid in full, or the Price of such livestock, owing by the buyer under these terms and conditions:

- (a) when this clause does not apply, as agent of the vendor (including by reselling the livestock); and
- (b) when this clause applies, on the agent's own behalf exercising the rights of the vendor by subrogation or assignment under these terms and conditions (whether in the vendor's name or not) and, where title to the livestock has not passed to the agent, by selling the livestock as agent of the vendor without the agent having to account to the vendor for the proceeds of sale.

23.5. The agent may at any time, assign, transfer, securitise or otherwise dispose of all or any of its rights under these terms and conditions and any debts created pursuant to it (including, without limitation, the rights assigned to it under clause 23.3).

23.6. The vendor hereby irrevocably appoints the agent as the vendor's attorney to:

- (a) do at any time and in any manner as the agent thinks fit all acts necessary or desirable to perfect or improve the rights and interests afforded, or intended to be afforded, to the agent under these terms and conditions; and

(b) appoint one or more sub-attorneys to do anything that the agent may do as the vendor's attorney.

23.7. These terms and conditions do not render the agent liable to the buyer as vendor nor entitle the buyer to set off against the agent any right the buyer may have against the vendor or otherwise.

23.8. The buyer acknowledges that the provisions of this clause 23 are intended solely for the benefit of the agent (and its assigns) and the vendor. The liabilities and obligations of the buyer will not be in any way affected:

- (a) by this clause 23, other than as it expressly provides; or
- (b) by the failure of the agent or the vendor or either of them to comply with the terms of this clause 23.

23.9. The buyer must pay all amounts payable to the vendor or the agent under these terms and conditions without any deduction, withholding, set off or counterclaim whatsoever, whether the benefit of a deduction, withholding, set off or counterclaim is alleged to exist in favour of the buyer as against the vendor or the agent in any capacity whatsoever or any other person including any assignor of the vendor's or the buyer's interests under these terms and conditions.

24. (a) The agent agrees that he is liable to pay to the vendor the Price, less such commission as is agreed between the vendor and the agent, and in the absence of any agreement such amount as is reasonable, and less the Fees that are payable by the vendor that were incurred by the agent on behalf of the vendor in relation to the sale of the livestock.

(b) In the event that the buyer pays the Price or part of it direct to the vendor then the agent has no liability to the vendor for the amount of such payment. Further, if the agent pays the vendor any amount which the buyer also pays direct to the vendor in respect of the same livestock, then the vendor must repay the agent that amount and the agent may debit that amount to an account held in the name of the vendor by the agent.

(c) Regardless of whether or not a sale has occurred the agent may, but is not under obligation so to do, instead of deducting payments owed to it by the vendor, debit the amount of the commission and fees to an account held in the name of the vendor by the agent.

25. (a) The auctioneer has been retained by the vendor as auctioneer for the purpose of selling the livestock comprised in the lots. The terms of engagement between the auctioneer and the vendor do not extend to the provision of advice by the auctioneer to the vendor in relation to the safety or otherwise of the sale ring, the saleyards and the surrounding environments.

(b) The vendor, the agent and the buyer agree to comply with their several duties under the Australian Animal Welfare Standards and Guidelines for the Land Transport of Livestock and further to consign, manage, receive, transport and handle livestock in accordance with any other or additional requirements of animal welfare legislation specific to the jurisdiction in which livestock are consigned, managed, received, transported and handled in the course of the auction process.

CHAPTER THREE – VENDOR WARRANTY FOR CORRECT PRESENTATION AND DECLARATION

26. This chapter applies only in the case of livestock and their companion animals sold at auction for slaughter when the buyer is the slaughterer and the livestock are transported direct from the sale yard to the meatworks at which they are slaughtered. This chapter does not apply if the buyer is a trader who subsequently resells the livestock to a slaughterer. A slaughterer is any person who pays the AMPC Processor levy.

27. The warranty of a vendor is that livestock and their companion animals offered for sale at auction:

- (a) pass government and other regulatory authority requirements and inspections at the time of slaughter;
- (b) are of merchantable quality;
- (c) carry an NLIS device in accordance with State law;
- (d) in the case where a representation has been made in the pre-sale catalogue that the livestock have particular characteristics or are fit for a particular purpose or market, and such representations are based on information in any document, the livestock will have those characteristics or will be fit for the particular purpose or market; and
- (e) all information in any document provided by the vendor is true, complete and correct in all material respects.

28. In the event of a breach by the vendor of the vendor's warranty and provided such breach is notified by the buyer to the agent by 5:00pm on the 7th day after the fall of the hammer then the buyer is not liable to pay the portion of the Price of such of the vendor's livestock to which the breach applies.

29. However if the breach by the vendor is such that the livestock are not rejected outright but are instead downgraded then the buyer will pay the value of the livestock at their next highest and best use.

30. In the case of a breach by the vendor of the vendor's warranty then the vendor will also be liable to the buyer for any further losses which the buyer might establish but the buyer will take all reasonable steps in co-operation with the agent and vendor to mitigate both the effect of the breach and the amount of any loss.

31. Where a sentinel animal of a lot tests positive for chemical residue, or foreign material contamination and provided such test is certified and notified as required by these vendor warranty terms, then:

- (a) the buyer will be entitled to delay payment for the price of all livestock in that lot only; or
- (b) the vendor has the option, at the vendor's cost, of collecting the companion animals, if allowed by law; or of having the livestock slaughtered in which event the risk of further condemnations will be that of the vendor. Where product integrity is potentially jeopardised, the Processor has the right to refuse slaughter and send the livestock back to the consigning property at the vendor's cost.

32. The auctioneer is liable to the buyer in respect of any breach of the vendor's warranty arising out of:

- (a) any error, by the auctioneer, of transcription of information from the NVD completed by the vendor to the pre-sale catalogue or the buyers post-sale summary;
- (b) any failure by the auctioneer to notify the buyer, prior to bidding, of any breach by the vendor of the warranty of the vendor if the buyer establishes that the agent knew of such breach prior to the sale; and
- (c) any failure by the auctioneer to announce prior to bidding, or disclose in the pre-sale catalogue, that the vendor has failed to provide a NVD that is complete in all material aspects.

CHAPTER FOUR - OWNERS RISK FOR CONDITION OF CATTLE

33. This chapter applies only in the case of cattle and their companion animals sold at auction for slaughter when the buyer is the slaughterer and the cattle are transported direct from the sale yard to the meatworks at which they are slaughtered. This chapter does not apply if the buyer is a trader who subsequently resells cattle to a slaughterer. A slaughterer is any person who pays the AMPC Processor levy.

34. Owners risk reflects the producer's responsibility to provide slaughter cattle for sale that are fit for human consumption. Cattle are fit for human consumption if they are not condemned as unfit by government. Owners risk applies if the condemnation is due to a condition in the animal which the buyer establishes, by the relevant government certificate, existed prior to the fall of the hammer.

35. A buyer with the benefit of owners risk protection is not liable to pay the Price of that animal to the vendor. The buyer remains nevertheless liable for all costs incurred after the fall of the hammer in transport, slaughter, testing and disposal of the animal.

36. Owners risk protection is available to the buyer of cattle to which this chapter applies if all of the following are satisfied:

- (a) a certificate is issued by government which states the relevant NLIS RFID tag number and PIC, the date of the certificate, the reason for condemnation and that the reason for condemnation existed prior to the fall of the hammer;
- (b) the certificate is received by the selling agent either in its original form or by fax or electronic communication in the form of data, text or imaging by 5:00pm on the 7th day after the fall of the hammer; and
- (c) if the condemnation is due to chemical residue the certificate follows testing in a government approved laboratory which establishes maximum residue limits in excess of the Australian limit.

37. Owners risk does not apply, and the buyer must pay for the cattle, if the reason for condemnation is any of bruising, fever, partial condemnation or emaciation.

CHAPTER FIVE - NOTICES REQUIRED BY LEGISLATION

NSW Property, Stock and Business Agents Act 2002 Warnings

Penalties for collusive practices. It is an offence against the Property, Stock and Business Agents Act 2002 for a person to do any of the following as a result of a collusive practice, or to induce or attempt to induce another person by a collusive practice to do any of the following:

- (i) to abstain from bidding; or
- (ii) to bid to a limited extent only; or
- (iii) to do any other act that might prevent free and open competition.

Severe penalties may be imposed on persons convicted of collusive practices.

The auctioneer has the right to make one bid on behalf of the vendor if the auctioneer clearly and precisely announces that fact prior to the sale.

Tasmania Legislation. An auctioneer conducting a public auction must not appear to acknowledge the making of a bid if no bid was made. A person must not participate in collusive practices by way of making or receiving an unlawful promise to abstain from bidding, not to bid except to a limited extent or do any other thing which may prevent free and open competition.

WA Auction Sales Act 1973 s31 NOTICE.

It is an offence to:

- (i) induce or attempt to induce another person to abstain from bidding by means of a promise, expressed or implied, that the other person will have the right to elect to take over as buyer or to toss or draw lots to establish who is to become the owner;
 - (ii) abstain or agree to abstain from bidding as a result of such a promise;
 - (iii) knowingly enter or permit or cause to be entered in the auctioneer's record any name other than that of the actual successful bidder;
 - (iv) enter in the auctioneer's record the name of the buyer other than that of the actual successful bidder; or
 - (v) in the case of successful bidder supply wrong information as to the name of the buyer to the auctioneer or to any person, firm or corporation on whose behalf the sale is conducted.
- The vendor, or any person on behalf of the vendor, or the auctioneer have the right to make no more than three bids.
