Kuro Kin Fullblood Wagyu Sale

Welcome to the 2023 Kuro Kin Fullblood Wagyu bull sale. The high rainfall averages of 2022 seem like a distant memory here in the Upper Hunter Valley. The tap has certainly turned off, not that this wasn't expected to happen at some stage after the bumper years of 2021 and 2022. A more gradual decline would have been appreciated as we move forward, but we play the cards that we are dealt.

This leads into the preparation of the bulls for the 2023 Kuro Kin Wagyu annual sale. All bulls have been running on improved pastures through 2022 and the summer of 2023, adlib pasture pellets from Manildra Feeds have been introduced since October 2022, and this preparation has kept the bulls moving forward without overdoing them. They are ready to work, and have recieved 7in1, Vibrovax, Tick Fever, Pestiguard vaccines. Semen testing with morphology was conducted by Northern Artificial Breeders in August.

Finally, all animals are genomically tested and freeze branded. The results for the recessive gene testing will be displayed in the sale supplementary sheet.

Sire lines - 2023 Sale

KKWFN42 Itoshigenami, 5 bulls in the sale. A very consistent breeder, having sold 11 sons for a \$18,300 average including the top priced bull in 2022, KKWFS0052.

KKWFN84 Itoshigenami, 3 bulls in the sale. Sold the equal 2nd top priced bull in 2022, KKWFS0024.

N4431 Itoshigenami Jnr son, 7 bulls in the sale. First used in 2019, now his first daughters have their 2nd calf at foot and are doing a great job. Plenty of milk and fertility in them. We have also retained several R bulls by N4431 to use within the herd.

KKWFN48 Hiramichi Tsuru, 6 bulls in the sale.

KKWFN330, 7 bulls in this sale, also sold sons in last year's sale.

KKWFC109 Kanadagene DM100, 3 bulls in the sale. Sold 4 bulls in the 2022 sale. In our most recent Fullblood production, this bull sired three carcases, which graded a Marble Score 9, 9 and 8 respectively with an average hot carcase weight of 453 kg.

KKWFD72 Itozurudoi, 3 bulls in the sale. This bull has made a huge impact in the herd, not only through KKWFH0008 but his daughters. They are large framed cows with plenty of milk. D72 is a trait leader at +12 milk and +49 for 400 day. Lot 28 KKWFT0016 is a good D72 son, out of a Kanadagene/Katsumi cow H0053.

KKWFP50 Itozurudoi, 5 bulls in the sale. These are first P50 sons for sale. Sired by KKWFH0008, out of E9244. She is a blend of Kanadagene/Michifuku/Hikokura, a good cross for Itozurudoi. E9244 is still active in the herd, due to calf any day. In the recent production E9244 steer progeny R163, graded MS 8 and HSCWt 474 kg.

KKWFP28 Itozurudoi, 4 bulls in the sale. Also sired by KKWFH0008, this bull is out of L88, a J2351 over Katsumi. In the recent production KKWL88 had a steer KKWFR0242, sired by M144, it graded MS9+ and HSCWt 509 kg.

World K Michifuku, 2 bulls in the sale. Yes 2 direct Michifuku sons. Lot 6 KKWFT0021 is the first to be offered, the dam KKWFJ84 is still active, a direct Terutani 40/1 cow. Lot 31 KKWFT0020 is out of M467. In the recent production her progeny KKWFR0223, graded a MS 9 and HSCWt 411 kg.

KKWFN25 Michifuku, 4 bulls in the sale. Lot 50 KKWFT0174 by N25 out of a D72 daughter. Her first calf KKWFS0054, is a bull we retained in the herd. Lot 50, KKWFT0174 displays an unique set of EBV's, +2 milk, +5.5 EMA.

World K Haruki 2, 1 bull in the sale. Lot 23 KKWFT0040 has positive fat EBV as you except and positive milk. A chance to purchase a bull from a foundation sire.

More on the Beef program at Pinnacle Fine Foods

Through the start of 2023, we continue to raise, feed, and process our own cattle, which are Fullblood Wagyu, F1 (Fullblood x Angus), and straight Angus cattle.

The company's Fullblood female cattle are currently distributed across three properties: Clearhills, Glenrock Station, and Wootton. These properties will calve at least 1000 head of core breeding females each year.

In addition to the Fullblood females, the Angus and F1 programs will also produce 10,000 weaners. Glenrock Station (Scone) and Oak Park Station (Charleville) serve as the main cow/calf properties.

We engage in various finishing programs across different feedlots, with an annual capacity to feed over 10,000 finishing cattle.

The table (see page 7) provides a snapshot of recent Fullblood carcase data, including 450 days of feeding, customized feed, processed and the meat labelled under the Kuro Kin brand.

As always feel free to get in touch and we hope to see you at the annual sale on the 6 September 2023.

With thanks from the team at Kuro Kin Wagyu

(all contacts are on the inside front cover)

All intending buyers will be required to register with the selling agents prior to commencement of the sale.

The live auction will take place from 1 pm at Brindley Park, 6255 Scone Road, Merriwa NSW 2329 and interfaced online with **AuctionsPlus**. Online bidding will be active and running simultaneously with the live on farm auction.

Supplementary sheets are available on sale day. **Sale day inspections** from 9.30 am.

Sale day safety

Please make yourself aware of any COVID 19 restrictions that maybe currently in place. Potential buyers can observe the cattle from outside the pens. Supervision is also available to observe them walking out. Visitors enter the pens at their own risk. Children must not enter the pens.

Pre-sale all bulls are handled quietly with horses, buggy, dogs and on foot. They are constantly monitored for temperament, but the sale day environment can cause animals to behave unpredictably.

Rebate: A rebate of 2% will be paid to licensed agents accompanying, attending on the behalf of or introducing their clients in writing NO later than 24 hours prior to the sale and settling their purchases within 7 days.

Insurance: It is recommended that you insure your purchases before they are transported. Please arrange this with the selling agents. All care will be taken from the fall of the hammer.

Transport and delivery: The sale is at Brindley Park, 6255 Scone Road, Merriwa NSW 2329. Transportation within seven (7) days post sale, unless other arrangements are made.

Buyer must fill out **Buyers Instruction (Delivery) Form** (see page 50 of this catalogue).

Health check

Physical examination: All bulls have passed a bull breeding soundness evaluation test by vet Peter Gorman, Upper Hunter Veterinary Services, Scone.

- ✓ Palpation of testis and scrotum
- ✓ Visual inspection of overall structure (including feet)
- Semen testing and morphologies by Northern Artificial Breeders, Scone.

All bulls have received:

- ✓ DNA parent verified and genomics on all bulls
- ✓ Injectable drench Dectomax Pour-On
- ✓ 2 x 7 in 1, plus an annual booster
- ✓ 2 x Vibriovax, plus an annual 5 ml booster
- ✓ Pestigard vaccinated
- ✓ Recessive gene testing done on all bulls.
- ✓ Freeze branded with the stud identification.

Semen rights: All bulls sell with 100% semen marketing rights to the purchaser. Kuro Kin Wagyu, as the vendor, retains the right to collect up to 400 straws of semen from any bull in this sale lineup for use within it's herd. This would be done at the convenience of the buyer and all expenses covered by the vendor.

Your guarantee: The vendor warrants that the bulls are fertile and Capable of natural service within six (6) months of the date of the sale. If deemed unable the vendor shall

- 1. Provide a satisfactory replacement or
- 2. Provide a credit for use at the next Kuro Kin Wagyu Sale equal to the purchase price of the bull, excluding any costs associated with taking delivery.

If a purchaser claims that the bull is infertile, the purchaser must obtain and submit a veterinary Report stating that the bull is infertile or incapable of service. This report must also state that it is not the result of any injury received or illness.

Biosecurity

Biosecurity is important to us here at Kuro Kin Wagyu. We believe in good biosecurity practices, whereby at all entry points to the property, we reduce the potential risk for the introduction of infectious diseases and/or noxious plants onto our property. You will also help protect other herds and businesses by preventing the unwanted spread of diseases, pests, or plants.

Please come clean, go clean

If you are attending the Kuro Kin Wagyu Bull Auction in person, please ensure your vehicle, all clothing and footwear is clean.

Please remove all soil, animal, and plant material. If required, scrub the items with soap and water, and allow the item to dry.

Wagyu BREEDPLAN EBVs

Australian Wagyu genetic analysis

Wagyu BREEDPLAN is the genetic evaluation program implemented by the Australian Wagyu Association which uses Best Linear Unbiased Prediction (BLUP) technology to produce Estimated Breeding Values (EBVs) of performance and pedigree recorded cattle for a range of economically important production traits (e.g. weight, carcase, fertility). More than 600 scientific publications have been produced describing BREEDPLAN and its implementation for driving genetic progress across cattle breeds.

Wagyu BREEDPLAN includes pedigree, performance and genomic information from the Australian Wagyu Association's database, which is on the largest globally available Japanese Black database, to evaluate the genetic merit of animals.

The Wagyu BREEDPLAN analysis provides the most thorough and accurate assessment of Fullblood Wagyu genetics available outside Japan. The analysis includes over 250,000 registered Wagyu animals with 149,000 dams and 21,500 sires. In addition, there are 51,000 animals with birth weights, 57,000 with weaning (200-Day) weights and 45,000 with 400-Day weights. Carcase data includes 27,000 carcase weights, 17,000 carcase EMAs and a total of 25,500 carcase Aus-Meat marble scores, camera marbling percent and camera fineness index measures.

Estimated Breeding Values (EBVs)

An animal's breeding value is its genetic merit, half of which will be passed on to its progeny. While we will never know the exact breeding value, it is possible to make good estimates based on the performance of the animal and its progeny. These are called Estimated Breeding Values (EBVs) and are therefore the best estimate of an animal's genetic merit. EBVs are expressed as the difference between an individual animal's genetics and a historical genetic level (i.e. group of animals) within the Wagyu BREEDPLAN genetic evaluation and are reported in the units in which the measurements are taken.

Estimated Breeding Values for an animal may change as additional performance data or genotype information is provided for that animal or animals within that animal's pedigree. It is not unusual for EBVs to change, particularly where the EBVs are low accuracy (<50%). For hard to measure, or traits that can only be measured late in life, such as carcase and meat quality traits, EBVs provide the best estimate of an individual's genetic merit early in life to help inform management decisions.

Submission of performance data can have a large bearing on the estimate of an animal's genetic merit over its life and this will impact the genetic merit of the animal's progeny. As the accuracy of an EBV improves over time (along with more data and genotype information), EBV values will be more constant. Please refer to the section on Accuracy within this guide for additional information.

Using EBVs to compare animals

Wagyu BREEDPLAN EBVs can be used to estimate the expected difference in the genetics of two animals. The expected difference equals half the difference in the EBVs of the animals, assuming they are used in the same way (i.e. they are joined to the same animal/s). For example, a bull with a 200 Day Growth EBV of +20 would be expected to produce progeny that are, on average, 5 kg heavier at 200 days of age than a bull with a 200 Day Growth EBV of +10 kg (i.e. 10 kg difference between the sire's EBVs, then halved as the sire only contributes half the genetics).

Benchmarking an animal within the breed

EBVs can also be used to benchmark an animal's genetics relative to the genetics of other Wagyu animals. To benchmark an animal's genetics relative to other Wagyu animals, the EBV can be compared to the breed average EBV for the trait or the percentile table.

Accuracy

An accuracy value is presented with every EBV and gives an indication of the amount of information that has been used in the calculation of that EBV. The higher the accuracy, the lower the likelihood of change in the animal's EBV as more information is analysed for that animal or its relatives.

Accuracy range interpretation

Less than 50% = Low accuracy and should be considered a preliminary estimate. The EBV could change substantially as more performance information becomes available, however the EBV is still the best guide for genetic merit of the animal at that point.

50-74% = Medium accuracy, usually based on the animal's own performance records, genomics and pedigree.

75-90% = Medium-high accuracy and also includes some progeny information. Becoming a more reliable indicator of the animal's true value as a parent.

90% and above = High accuracy associated with a large amount of performance and progeny information.

Fertility and birth EBVs

Scrotal Size EBV (SS) (cm) is an indicator of male fertility in regard to semen quality and quantity in Western breeds of cattle. Higher (positive) EBVs indicate higher fertility. There is also a small negative correlation (desirable) with the age of puberty and fertility in female progeny. The relationship between scrotal size and fertility in Wagyu is assumed, but not proven.

Gestation Length EBV (GL) (days) is based on Al records. Lower (negative) GL EBVs indicate shorter gestation lengths which generally relate to lighter birth weights and easier calving.

Birth Weight EBV (BW) (kg) is based on the measured birth weight of animals, adjusted for dam age. The lower the value the lighter the calf at birth and the lower the likelihood of a difficult birth. This is particularly important when selecting sires for use over heifers.

Growth EBVs

200-Day Milk EBV (MILK) (kg) is an estimate of an animal's milking ability. For sires, this EBV is indicative of their daughter's milking ability as it affects the 200-day weight of their calves.

200-Day Growth EBV (200) (kg) is calculated from the weight of animals taken between 80 and 300 days of age. Values are adjusted to 200 days and for dam age. This EBV is the best single estimate of an animal's genetic merit for growth to early ages.

400-Day Weight EBV (400) (kg) is calculated from the weight of animals taken between 301 and 500 days of age, adjusted to 400 days and for dam age. This EBV is the best single estimate of an animal's genetic merit for yearling weight.

600-Day Weight EBV (600) (kg) is calculated from the weight of animals taken between 501 and 900 days of age, adjusted to 600 days and for dam age. This EBV is the best single estimate of an animal's genetic merit for growth beyond yearling age.

Mature Cow Weight EBV (MCW) (kg) is based on the weight of the cow when the calf is weighed for weaning, adjusted to five years of age. This EBV is an estimate of the genetic difference in cow weight at five years of age and is an indicator of growth at later ages and potential feed maintenance requirements of the females in the breeding herd. Breeders of steers wishing to grow animals out to a larger weight may also use the Mature Cow Weight EBV.

Carcase EBVs

Carcase Weight EBV (CWt) (kg) is based on abattoir carcase records and live weight measurements (particularly 600 Day weight) and is an indicator of the genetic differences in carcase weight at the industry average slaughter age of 990 days. Larger positive values are more favourable.

Eye Muscle Area EBV (EMA) (cm²) estimates genetic differences in eye muscle area at the 12/13th rib site of a 420kg dressed carcase. A higher positive EBV indicates larger eye muscle area and therefore higher retail beef yields. Ultrasound, Aus-Meat and Japanese Digital Image Camera measured Eye Muscle Areas from slaughter animals contribute to this EBV.

Rump Fat EBV (RUMP) (mm) stimates the genetic differences in fat depth at the P8 site of a 420kg dressed carcase. A higher positive EBV indicates more subcutaneous fat and earlier maturity.

Retail Beef Yield Percent EBV (RBY) (%) estimates the genetic differences in total (boned out) meat yield as a percentage of a 420kg dressed carcase. A higher positive EBV indicates higher percentage yield for the 420kg carcase weight.

Marble Score EBV (MS) (Aus-Meat Marble Score) is an estimate of the genetic difference in the Aus-Meat Marble Score in a 420kg carcase. Marble Score EBV utilises Aus-Meat Marble score on a scale of 1 to 10 where 10 is equivalent to an Aus-Meat Marble Score grading of 9+. Where results from the Meat Image Japan digital carcase camera are available, Camera Marbling Percentage and Marble Fineness are also used to calculate Marble Score EBV as the genetic correlations between these measures and Aus-Meat Marble Score are very high. Larger positive values are more favourable.

Marble Fineness EBV (MF) (Marbling Fineness Index) estimates the genetic differences in the Marbling Fineness Index (degree of fineness of marbling fat) as measured by the Japanese Digital Image Camera. A higher more positive EBV indicates higher levels of marbling fineness.

Wagyu BreedObject \$INDEXES

BreedObject \$Indexes, which utilise Wagyu BREEDPLAN EBVs, are now available and allows selection of Wagyu seedstock based on profitability for different commercial production systems. Four Wagyu BreedObject \$Indexes have been developed to date:

Self-Replacing Breeding \$Index (SRI)

Wagyu Breeder \$Index (WBI)

Wagyu Fullblood Terminal \$Index (FTI)

Wagyu F1 Terminal \$Index (F1I)

Each of the \$Indexes are targeted specifically to a defined Wagyu production and market scenario and producers should identify and use the index that best suits their purpose. It is not appropriate to compare index values of different \$Indexes as they are based on different production model assumptions. It is not the index with the highest \$ value that you should use, it is the index that best reflects your production system.

BreedObject \$Indexes target economic breeding objectives based on average herd and market conditions and have generally targeted the main markets within the main production systems, combining genetic information within BREEDPLAN into one EBV for each \$Index that considers production costs and realised value.

Self-Replacing Breeding Index (SRI)

The Self-replacing Index can be used to select Fullblood bulls that will produce more profitable females when these are retained in Fullblood or Purebred herds, in addition to profitable slaughter progeny.

The SRI estimates the genetic differences between animals in terms of net profitability per cow joined for production of replacement females and slaughter steers to a carcase weight of 435kg at 32 months of age and a 385kg carcase from surplus heifers at 29 months of age. In terms of relative economic importance, the SRI places the following emphasis on these main traits: 41% on marble score (MS); 14% on Residual Feed Intake (RFI) feedlot; 12% on sale liveweight (which will reflect the growth potential and therefore carcase weight of an animal); 9% on meat yield; 6% on dressing percentage and 23.5% placed on other cow and calf traits.

Wagyu Breeder Index (WBI)

The Wagyu Breeder Index estimates the genetic differences between animals in net profitability per cow joined in a commercial Fullblood or Purebred self-replacing herd that has a low-input, grass-based production system. Heifers are retained for breeding and steers and surplus females are sold as feeders for feedlot finishing.

Steers are assumed to be slaughtered at 32 months after 550 days of feedlot finishing targeting 460kg carcases.

Heifers are retained for breeding and therefore maternal traits are of importance. Marbling is targeted at breed average with optimised growth.

In terms of relative economic importance, the WBI places the following emphasis on these main traits: 37% on marble score (MS); 12% on sale liveweight; 9% on meat yield; 7% on dressing percentage and 13% placed on other cow and calf traits.

Fullblood Terminal Index (FTI)

The Fullblood Terminal Index has an increased weighting on the Marble Score EBV and can be used to select bulls to produce profitable slaughter progeny where none are retained for breeding. The FTI estimates the genetic differences between animals in terms of net profitability per cow joined based on production of slaughter stock only, with a 435kg carcase from steers at 32 months of age and a 385kg carcase from heifers at 29 months of age. In terms of relative economic importance, the FTI places the following emphasis on these main traits: 64% on MS; 11% on Residual Feed Intake (RFI) feedlot; 9% on sale liveweight; 7% on meat yield; 5% on dressing percentage and 3% placed on other young animal traits and 0% on maternal traits.

F1 Terminal Index (F11)

The F1 Terminal Index has an increased weighting on the Marble Score EBV and can be used to select bulls to produce profitable F1 slaughter progeny where none are retained for breeding.

The F1 Index estimates the genetic differences between animals in terms of net profitability cow joined based on production of a 420kg carcase from steers and a 387kg carcase from heifers at 28 months of age. In terms of relative economic importance, the F1 Index places the following emphasis on these main traits: 68% on MS; 9% on Residual Feed Intake (RFI) feedlot; 4% on sale liveweight; 6% on meat yield; 4% on dressing percentage and 9% placed on other young animal traits and 0% on maternal traits.

Genetic conditions in Wagyu cattle

All breeds of cattle, have undesirable genetic conditions. Fortunately, advances in molecular genetics have facilitated the development of DNA tests for the conditions which enable them to be managed. Breed societies are at the forefront of developing strategies to manage undesirable genetic conditions and seedstock members are leading the industry with their uptake of this technology.

Known genetic conditions of Wagyu:

SPHEROCYSTOSIS (B3) - Cattle that are homozygous (two copies of the recessive allele) have pernicious anaemia (bleeding caused by the abnormal red blood cells). Death normally occurs within the first seven days after birth. Some cases live to adulthood but there is a severe retardation in growth.

CHEDIAK HIGASHI SYNDROME (CHS) - Cattle that are homozygous (two copies of the recessive allele) have a reduced immune response to disease which reduces their ability to resist bacterial infection. Blood is slow to coagulate so often the first indicator is unusual umbilical cord bleeding at calving. Cattle with this syndrome often have an unusually pale coat colour.

CLAUDIN 16 DEFICIENCY (CL16) – Cattle that are homozygous (two copies of the recessive allele) have terminal kidney failure and the onset can occur any time from late adolescence. Cattle are unlikely to live more than six years.

FACTOR XI DEFICIENCY (F11) – Cattle that are homozygous (two copies of the recessive allele) show prolonged bleeding time after castration or dehorning. It is also possible that Carrier x Carrier matings have increased difficulty producing viable fertilised embryos or full term pregnancies and may be repeat (return to cycle) breeders.

NOTE - This is generally a non-lethal recessive condition with affected animals being able to live as normal. This Australian Wagyu population has a high frequency of F11 carriers, which makes it an important genetic condition to manage.

IARS DISORDER – Also known as perinatal weak calf syndrome, the disorder results in death within the last few weeks of gestation or few days of life. A mutation in the IARS gene (isoleucyl-tRNA synthetase) causes a reduction in activity of the enzyme for protein synthesis for a developing embryo and newbornds. Calves affected by this disorder exhibit anaemia, depression, weakness, variable body temperature, difficulty nursing, growth retardation, and increased susceptibility to infection.

Carriers of genetic conditions may be useful in Terminal breeding programs where all the progeny are slaughtered and not used for breeding purposes.

Code explanation

The first two, three or four characters vary with the genetic condition

ie. B3, CHS, CL16, F11, F13 or IARS

__F Indicates that the sample submitted for this animal has been tested and found to be FREE of the causative mutation responsible for the indicated genetic condition. This animal is homozygous free, meaning that it has two copies of the normal variant (or allele) of the gene.

Shown in $\ensuremath{\mathbf{GREEN}}$ in the lot listing within the catalogue.

__C Indicates that the sample submitted for this animal has been tested and found to be a CARRIER of the causative mutation responsible for the indicated genetic condition. This animal is heterozygous for the mutation, meaning that it has one mutant allele and one normal allele. This animal could pass the mutation to approximately half of its progeny.

__FU Indicates that, based on pedigree information supplied by the breeder of the animal, the animal is expected to be free of the mutation responsible for the indicated genetic condition. However, this animal HAS NOTBEENTESTED for the causative mutation and the AWA gives no guarantee as to the animal's "free" status.

_ _A

Indicates that the sample submitted for this animal has been tested and found to be AFFECTED by the genetic condition. This animal is homozygous for the mutation responsible for the genetic condition and has two copies of the mutant variant of the gene.

LIVESTOCK AUCTION TERMS AND CONDITIONS OF SALE

CHAPTER ONE - PRELIMINARY

- (a) A vendor is bound by these terms and conditions by offering livestock for sale
 - (b) An agent (which includes an auctioneer) is bound by these terms and conditions by conducting an auction sale.
- (c) A buyer is bound by these terms and conditions by bidding at auction.

 (a) In these terms the expression auctioneer, agent, buyer and vendor respectively includes the servants, contractors, agents of each of them. The auctioneer, agent, buyer and vendor shall be wholly responsible for the acts and omissions of their respective servants, contractors and agents. The term "auctioneer includes, so far as the law and context permits, the vendor's agent.
 - (b) When used in these terms the expressions "companion animals" means all animals originating from a property on a particular day. Where lots are split and sent to multiple establishments, then all of these animals shall be regarded as companions.
- The following applies in interpreting these terms and conditions:
- The following words have the following meanings:

Fees means all levies, charges, fees, costs and other expenses incurred or relating to these terms and conditions and the sale and purchase of livestock including, without limitation, transaction levies, yard and weigh dues, cartage, advertising and rebates, and whether paid for, or incurred, by the agent; Livestock means animals auctioned pursuant to these terms and conditions; and

Price means the amount at which the lot has been sold to the buyer referred to in clause 7 of these terms and conditions

- ii) plus any Fees and other expenses incurred in relation to the purchase of livestock that are payable by the buyer, and
 iii) plus any GST added in accordance with clause 12.
- (ii) plus any us1 adoed in accordance with clause 12.

 These terms and conditions are subject to legislation or regulation in the

 State in which the auction is conducted and in the event of any conflict then
 the legislation or regulation will prevail. The provisions of these terms and
 conditions are in addition to, and do not derogate from, the duties and rights of
 vendors, agents and buyers set out in legislation and regulation in the State in which the auction is conducted.

CHAPTER TWO - STANDARD TERMS OF SALE

- Subject to any reserve price, and to the right, prior to the fall of the hammer, of the vendor to withdraw any lot without declaring the reserve, the highest bidder shall be the buyer.
- The auctioneer has the right to bid on behalf of the vendor provided that right is
- A bid cannot be made or accepted after the fall of the hammer unless, in accordance with clause 8, the auctioneer decides to put the lot up again.
- The last price called by the auctioneer at the fall of the hammer shall be the amount at which the lot has been sold.
- In the event of a disputed bid, the auctioneer is the sole arbitrator of the successful bidder or the auctioneer may decide to put the lot up again. The auctioneer's decision is final.
- The auctioneer may refuse to accept any bid which, in the auctioneer's opinion, is
- The autonomen may retract to accept any out winter, in the autonomen's opinion, not in the best interests of the vendor and need not give reasons for doing so.

 A bidder shall be deemed to be a principal unless, prior to bidding, the bidder has given to the auctioneer a copy of written authority to bid for or on behalf of another
- The successful bidder at a livestock auction sale must give to the auctioneer at the
 - fall of the hammer: (a) the purchaser's name; or
 - (b) the bid card number which identifies the purchaser; or
 - (c) the name of the person on whose behalf the successful bid was made; and (d) the Property Identification Code (known as the "PIC") of destination.
 - The auction shall be conducted on the basis that the bid price shall be exclusive of Goods and Services Tax (GST). GST shall be added after the fall of the hammer for
- those sales subject to GST. The vendor warrants that the:
 - (a) vendor has (or will have) the right to sell the livestock at the time of delivery; and (b) buyer will obtain title on completion of the buyer's obligation under these terms and conditions.
- If a buyer does not comply with any of these terms and conditions, which includes If a Duyer does not comply with any of these terms and conditions, which includes the requirements of State law, any livestock knocked down to that buyer may be re-sold by public auction or private contract in whatever lots and manner the auctioneer decides. The re-sale may be with or without notice and shall be at the buyer's risk. The buyer is responsible for all loss and expense arising out of a re-sale and is not entitled to any resulting profit.
- and is not entitled to any resulting profit.

 The buyer of livestock must pay the agent the full amount of the purchase price in immediate funds on receipt of a tax invoice. Payment is required prior to delivery unless some other time for payment is specified in a written agreement between the buyer and the auctioneer that was made before the fall of the hammer. If, before delivery, payment has not been made then clauses 20 to 23 apply.

 No person may bid unless, prior to the commencement of the sale, that person has made arrangements satisfactory to the auctioneer for payment for livestock purchased. If bids in breach of this condition are inadvertently accepted, delivery chall not be dress until the our purchase more in add and any way to be greated to the
- purchased. If bids in breach of this condition are inadvertently accepted, delivery shall not be given until the purchase money is paid and any law, rule or practice to the contrary is accordingly negatived as far as possible.

 (a) Cattle sold on a liveweight basis that are weighed pre-sale are at the risk and expense of the buyer upon the fall of the hammer.

 (b) Cattle sold on a liveweight basis that are weighed post-sale are at the risk and expense of the buyer immediately after weighing.

 (c) All livestock other than cattle sold on a liveweight basis are at the risk and expense of the buyer upon the fall of the hammer.

- (a) Subject to the object upon the fail of the hammer.
 (b) The time for rejection is the time commencing at the fall of the hammer and ending at the first of:
 - (i) delivery is taken by a representative of the buyer; (ii) departure of the animal from the purchaser's delivery pen; or
 - (iii) one hour after the last animal is:
 - (III) one nour after the last animal is:
 a. in the case of pre-sale weighing, sold; or
 b. in the case of post-sale weighing, weighed.

 During the time for rejection the buyer may reject any animal which is lame,
 blind or diseased where that condition existed prior to the fall of the hammer
 but could not be reasonably observed when the animal was in the selling pen.

 - but could not be reasonably observed when the animal was in the selling pen.

 (d) If the purchaser rejects an animal during the time for rejection then the sale of that animal is cancelled and the animal is returned to the wendor or sold on such terms as any buyer and the agent may agree, after the agent has disclosed the reason for rejection to that buyer.

 (e) This sub-clause applies only to cattle which are sold in Queensland at auction for slaughter. The agent has responsibility for the prevention of loss or escape (but not death, sickness or injury) of those cattle from the time of the fall of the hammer, through delivery to and from the scales, to the buyer's delivery pen and on to the buyer's nominated transport. This responsibility ends at the earlier of those cattle boarding the buyer's nominated transport or sunset on the day after the sale. This sub-clause does not apply if the agent makes an announcement to that effect prior to sale.

 (a) Subject to the right of rejection in Clause 18, all conditions and warranties
- announcement to that effect prior to sale.

 a Subject to the right of rejection in Clause 18, all conditions and warranties expressed or implied by law are hereby excluded from the sale to the extent that the law allows. All lots are open for inspection prior to the commencement of the sale and are sold with all faults, if any. No compensation shall be given for any faults, imperfections, errors of description, number in or of any lots sold or otherwise.

 (b) Any claim or objection arising out of an error or misdescription in the provision of relevant information in terms of feeligation or regulating concerning the
 - or frelevant information in terms of legislation or regulation concerning the National Livestock Identification Scheme (NLIS) must be made by 5:00pm on the seventh day after the fall of the harmer. No objection, requisition or claim against the vendor or agent in respect of such error or misdescription can be ade after that time
 - (c) Any statements made by the vendor or the auctioneer whether in writing or orally to the effect that any female has been pregnancy tested or scanned positive shall mean and require only that a certificate in writing shall be

- supplied to the buyer signed by a qualified veterinary surgeon or certified scanner certifying that the said female has been tested or scanned on the date specified in the certificate and that in the opinion of the surgeon or scanner the
- female was pregnant on that date.

 (d) For cattle, the agent undertakes to make every reasonable effort to ensure that any NLIS cattle device number is transferred from the saleyard account to the purchaser's account on the NLIS database no later than midnight on the day of the sale.
- Where livestock have a food safety or market eligibility status derived from the NVD and/or the NLIS/ERP database, the agent will inform the buyers by presale catalogue in conjunction with vendor branding and/or announce the status prior to the offering of those lots.
- If delivery is made to, or possession obtained by, the buyer or its representative before full payment of the Price, then until full payment is received, the buyer:

 - before full payment of the Price, then until full payment is received, the buyer:
 (a) does not acquire title to the livestock;
 (b) holds the livestock as ballee only for the vendor;
 (c) must act in a fiduciary capacity in its relationship with the vendor;
 (d) must store the stock separately or so that they are readily distinguishable from other livestock owned by the buyer;
 (e) is responsible for the safety and well being of the livestock;

 - is responsible for the safety and well being of the livestock; may make a bona fide sale for market value of any or all of the livestock. As between the buyer and the subsequent buyer, the sale shall be made by the buyer in its own name and not as agent for the vendor, however as between the vendor and buyer, the sale shall be made as bailee and agent for the vendor; and must keep and account for the proceeds of any subsequent sale separately from its other money and hold those proceeds, together with the benefits of any rights against subsequent buyers, on trust for the vendor.
- The buyer agrees that:
- any rights against subsequent buyers, on trust for the vendor.

 The buyer agrees that:

 (a) clause 20 creates a registrable security interest under the personal Property Securities Act 2000 (PPSA);

 (b) the buyer acknowledges the rights of the vendor (and/or the agent is clause 23 applies) to register a financing statement under the PPSA with respect to the security interest created by this clause;

 (c) the livestock are collateral for the purpose of the PPSA;

 (d) to the extent permitted, the buyer waives any right the buyer has under the PPSA to receive notices;

 (e) the date upon which the security interest created by this clause comes into force is the first date on which livestock are delivered pursuant to these terms and conditions; and

 (f) if payment is not made in according to clause 15, but delivery is made to, or possession obtained by, the buyer or its representative, interest may be charged at the rate usually charged by the agent for overdue accounts on any amounts which remain owing at any time.

 The buyer may not make any claim against the vendor for actions by the vendor or its agent under clauses 20 or 21 and indemnifies the vendor and its agent against any loss, damage, costs, expenses, penalties, fines or claims suffered by the vendor, the agent or any person or entity arising from the vendor exercising its rights under clauses 20 or 21.

 Clause 23 applies whenever the agent pays the vendor before being paid by the vendor or and the passes as the body of the agent is the bed of except and the passes as the bed of the passes as the bed of except and the passes as the b
- Clause 23 applies whenever the agent pays the vendor before being paid by the buyer, which the agent is not bound to do. The agent is then the del credere agent of the vendor at law.
- The vendor hereby gives notice to the buyer of the assignments referred to in clause 23.3.
- When this clause applies, in addition to any rights of the agent that arise by operation of the law, the parties agree that, subject to clause 23.6 the agent is subrogated to all rights of the vendor under these terms and conditions against the
- Title to the livestock does not pass to the agent or a nominee of the agent unless
- The to the livestock does not pass to the agent or a nominee of the agent unless the agent, by written notice to the vendor, notifies the vendor that it is to be transferred to the agent or a nominee of the agent.

 The vendor acknowledges that the agent may take enforcement, repossession or other action to recover any livestock for which the buyer has not paid in full, or the Price of such livestock, owing by the buyer under these terms and conditions:
- (a) when this clause does not apply, as agent of the vendor (including by reselling
 - the livestock); and when this clause applies, on the agent's own behalf exercising the rights of the vendor by subrogation or assignment under these terms and conditions (whether in the vendor's name or not) and, where title to the livestock has no passed to the agent, by selling the livestock as agent of the vendor without tagent having to account to the vendor for the proceeds of sale.
- 23.6. The agent may at any time, assign, transfer, securitise or otherwise dispose of all or any of its rights under these terms and conditions and any debts created pursuant to it (including, without limitation, the rights assigned to it under clause 23.3). The vendor hereby irrevocably appoints the agent as the vendor's attorney to:
- (a) do at any time and in any manner as the agent thinks fit all acts necessary or
 - desirable to perfect or improve the rights and interests afforded, or intended to be afforded, to the agent under these terms and conditions; and (b) appoint one or more sub-attorneys to do anything that the agent may do as the vendor's attorney.
- 23.8. These terms and conditions do not render the agent liable to the buyer as vendor
- These terms and conditions do not render the agent lable to the buyer as vendor nor entitle the buyer to set off against the agent any right the buyer may have against the vendor or otherwise.

 The buyer acknowledges that the provisions of this clause 23 are intended solely for the benefit of the agent (and its assigns) and the vendor. The liabilities and obligations of the buyer will not be in any way affected:

 (a) by this clause 23, other than as it expressly provides; or

 (b) by the failure of the agent or the vendor or either of them to comply with the terms of this clause 23.
- terms of this clause 23.

 23.10. The buyer must pay all amounts payable to the vendor or the agent under these terms and conditions without any deduction, withholding, set off or counterclaim whatsoever, whether the benefit of a deduction, withholding, set off or counterclaim is alleged to exist in favour of the buyer as against the vendor or the agent in any capacity whatsoever or any other person including any assignor of the vendor's or the buyer's interests under these terms and conditions.
- vendor's or the buyer's interests under these terms and conditions.

 (a) The agent agrees that he is liable to pay to the vendor the Price, less such commission as is agreed between the vendor and the agent, and in the absence of any agreement such amount as is reasonable, and less the Fees that are payable by the vendor that were incurred by the agent on behalf of the vendor in relation to the sale of the livestock.

 (b) In the event that the buyer pays the Price or part of it direct to the vendor then the agent as no liability to the vendor for the amount of such payment. Further, if the agent pays the vendor any amount which the buyer also pays direct to the vendor in respect of the same livestock, then the vendor must repay the agent that amount and the agent may debit that amount to an account held in the name of the vendor by the agent.

 (c) Regardless of whether or not a sale has occurred the agent may, but is not under obligation so to do, instead of deducting payments owed to it by the vendor, debit the amount of the commission and fees to an account held in the name of the vendor by the agent.
- vendor, debit the amount of the commission and fees to an account held in the name of the vendor by the agent.

 The auctioneer has been retained by the vendor as auctioneer for the purpose of selling the livestock comprised in the lots. The terms of engagement between the auctioneer and the vendor do not extend to the provision of advice by the auctioneer to the vendor in relation to the safety or otherwise of the sale ring, the saleyards and the surrounding environments.
 - (b) The vendor, the agent and the buyer agree to comply with their several duties under the Australian Welfare Standards and Guidelines for the Land Transport of Livestock and further to consign, manage, receive, transport and treat livestock in accordance with any other or additional requirements of animal welfare legislation specific to the State or States in which livestock are consigned, managed, received, transported and treated in the course of the auction process.

CHAPTER THREE

VENDOR WARRANTY FOR CORRECT PRESENTATION AND DECLARATION This chapter applies only in the case of livestock and their companion animals sold at auction for slaughter when the buyer is the slaughterer and the livestock are transported direct from the sale yard to the meatworks at which they are

slaughtered. This chapter does not apply if the buyer is a trader who subsequently resells the livestock to a slaughterer. A slaughterer is any person who pays the AMPC Processor levv.

Elders

- The warranty of a vendor is that livestock and their companion animals offer sale at auction:
 - (a) pass DAFF and other regulatory authority requirements and inspections at the time of slaughter; (DAFF refers to Federal Government Department of Agriculture, Fisheries and Forestry);
 (b) are of merchantable quality;

 - (c) carry an NLIS device in accordance with State law;
 - carry an NLIS device in accordance with State law; in the case where a representation has been made in the pre-sale catalogue that the livestock have particular characteristics or are fit for a particular purpose or market, and such representations are based on information in the National Vendro Declaration, the livestock will have those characteristics or will be fit for the particular purpose or market; and
- be into the particular purpose or market; and
 (e) all information in any National Vendor Declaration provided by the vendor is
 true, complete and correct in all material respects.

 In the event of a breach by the vendor of the vendor's warranty and provided such
 breach is notified by the buyer to the agent by 5:00pm on the 7th day after the fall
 of the hammer then the buyer is not liable to pay the portion of the Price of such of
 the vendor's livestock to which the breach applies.
- However if the breach by the vendor is such that the livestock are not rejected outright but are instead downgraded then the buyer will pay the value of the livestock at their next highest and best use.
- INVESTIGN. AT THEIR TEXT RIGHEST AND DEST USE. IN the case of a breach by the vendor of the vendor's warranty then the vendor will also be liable to the buyer for any further losses which the buyer might establish but the buyer will take all reasonable steps in co-operation with the agent and vendor to mitigate both the effect of the breach and the amount of any loss. Where a sentinel animal of a lot tests positive for chemical residue, or foreign material contamination and provided such test is certified and notified as required by these vendor warranty terms, then:

 (a) the buyer will be entitled to delay nament for the ratio of all lighteds in the light of the loss o
- - (a) the buyer will be entitled to delay payment for the price of all livestock in that
 - (b), the vendor has the option, at the vendor's cost, of collecting the companion animals and returning them to the vendor's property; or of having the livestock slaughtered in which event the risk of further condemnations will be that of saugnreed in which event the risk of rurrier condemnations will be that of the vendor. Where product integrity is potentially leporardised, the Processor has the right to refuse slaughter and send the livestock back to the consigning property at the vendor's cost.

 The auctioneer is liable to the buyer in respect of any breach of the vendor's warranty arising out of:
- - (a) any error, by the auctioneer, of transcription of information from the National A completed by the vendor to the pre-sale catalogue or the buyers post-sale summary;

 any failure by the auctioneer to notify the buyer, prior to bidding, of any breach

 - any failure by the exactioner to individual business of prior to broungly or any breach by the vendor of the warranty of the vendor if the buyer establishes that the agent knew of such breach prior to the sale; and any failure by the auctioneer to disclose prior to bidding, and in the presale catalogue, that the vendor has failed to provide a National Vendor Declaration that is complete in all material aspects.

CHAPTER FOUR - OWNERS RISK FOR CONDITION OF CATTLE

- This chapter applies only in the case of cattle and their companion animals sold at auction for slaughter when the buyer is the slaughterer and the cattle are transported direct from the sale yard to the meatworks at which they are slaughtered. This chapter does not apply if the buyer is a trader who subseque resells cattle to a slaughterer. A slaughterer is any person who pays the AMPC
- Processor levy.

 Owners risk reflects the producer's responsibility to provide slaughter cattle for Ownier's has reinced, the producter's responsionally to provide stadgment cattle for sale that are fit for human consumption. Cattle are fit for human consumption if they are not condemned as unfit by the relevant government department. Owners risk applies if the condemnation is due to a condition in the animal which the buyer establishes, by the certificate issued by the relevant government department, existed prior to the fall of the hammer.

 A buyer with the benefit of owners risk protection is not liable to pay the Price of that animal to the vendor. The buyer remains nevertheless liable for all costs
- incurred after the fall of the hammer in transport, slaughter, testing and disposal of
- Owners risk protection is available to the buyer of cattle to which this chapter applies if all of the following are satisfied:
 - applies if all of the following are satisfied:

 (a) a certificate is issued by the relevant government department which states the relevant NLIS RFID tag number and PIC, the date of the certificate, the reason for condemnation and that the reason for condemnation existed prior to the fall of the hammer;

 (b) the certificate is received by the selling agent either in its original form or by fax by 5:00pm on the 7th day after the fall of the hammer; and

 - by 5:00pmf of the 2rd ady after the fath of the natimers, and (c) if the condemnation is due to chemical residue the certificate follows testing in a laboratory approved by the relevant government department which establishes maximum residue limits in excess of the Australian limit.

 Owners risk does not apply, and the buyer must pay for the cattle, if the reason for condemnation is any of the following:

NSW Legislation

- (a) bruising, (b) fever, (c) partial condemnation, or (d) emaciation.
- CHAPTER FIVE NOTICES REQUIRED BY STATE LEGISLATION

Property, Stock and Business Agents Act 2002 Warnings Penalties for collusive practices. It is an offence against the Property, Stock and Business Agents Act 2002 for a person to do any of the following as a result of a collusive practice, or to induce or attempt to induce another person by a collusive

- practice to do any of the following:

 (i) to abstain from bidding; or
 - (ii) to bid to a limited extent only: or
- (iii) to do any other act that might prevent free and open competition.

Severe penalties may be imposed on persons convicted of collusive practices.

The auctioneer has the right to make one bid on behalf of the vendor if the auctioneer clearly and precisely announces that fact prior to the sale.

Tasmanian Legislation
The auctioneer must not appear to acknowledge a dummy bid. A buyer must not give, agree to give or offer a gift or other consideration to a person for abstaining from bidding and a person must not accept any gift or consideration for abstaining from bidding.

A person must not participate in collusive practices by way of making or receiving an unlawful promise to abstain from bidding, not to bid except to a limited extent or do any other thing which may prevent free and open competition

Western Australian Legislation - Auction Sales Act 1973 s31 NOTICE

- n oftence to:

 (i) induce or attempt to induce another person to abstain from bidding by means of a promise, expressed or implied, that the other person will have the right to elect to take over as buyer or to toss or draw lots to establish who is to become the owner;

 (ii) abstain or agree to abstain from bidding as a result of such a promise;

 (iii) knowingly enter or permit or cause to be entered in the auctioneer's record any name other than that of the actual successful bidder;

 (iv) enter in the auctioneer's record the name of the huver other than that of the
- (iv) enter in the auctioneer's record the name of the buyer other than that of the
- actual successful bidder; or (v) in the case of successful bidder supply wrong information as to the name of the buyer to the auctioneer or to any person, firm or corporation on whose behalf the sale is conducted.

The vendor, or any person on behalf of the vendor, or the auctioneer have the right to make no more than three bids.

Buyers instruction (delivery) form

(No verbal instruction will be accepted)
